Beats H. E. Doyle for First Time in Two Out of Three Sets.	Orange and Blue Players Perform in Brilliant Style, Making Long Runs.
--	---

In an interesting team match yesterday afternoon between the rascals of the Columbia and the Dumbarton clubs on the former's courts Columbia got sweet revenge for the defeat scored against it earlier in the season, taking five out of six singles matches and all three of the doubles.

It was a surprise when the boys took Harold E. Doyle into camp in three hard-fought sets, 6-3, 7-5 and 6-2. Gore is playing the game of his life this year, and has beaten several good men, but this is the first time he has beaten Doyle, who generally is considered as being right behind his brother "Connie" in the local tennis ranking. This victory was the only one scored by the Georgetown organization.

Doyle took the first set, which was a duce one, and then a sweet choice victory in the second and end the match, when at the ninth game he was within a

Special Dispatch to The Star.

CHARLOTTESVILLE, Va., October 30.—Virginia's backfield showed the best form of the season and its line was impregnable in today's game against Virginia Military Institute, the score being 14 to 0 in favor of Virginia. The backfield, consisting of the Cadets' five goals and one field goal. Varsity scored thirteen points in the first quarter, twenty-one in the second, seven in the third and three in the fourth.

The offense of the Cadets was very poor today. They were out of punting practically all of the time. They were outweighed, but made a desperate effort to score in the first period by kicking a field goal. The only player man featured in the punting work, while Mayer, Ed Anderson and Berkshire were the mainstay of the Cadets' sons being for forty-eight yards for a touchdown. Tippet made a field goal in the the ten-yard line against the wind.

[illegible]

Some exceptional tennis were rather disappointing, as all of them were won in straight sets.

Conditions were rather poor for tennis, as a brisk wind swept the courts, and did all kinds of stunts to the balls, and nearly froze the players and small gallery which was on hand.

## NATIONAL LAUNDRY BOWLERS ARE MAKING GREAT RECORD

---

Team Has Won Fifteen Games in Capital City League and Lost None—Thompson Tells of Value of Bowling.

The National Laundry five has been making a splendid record in the Capital City League, and right now has a clean slate. It has won fifteen games and has yet to meet defeat. The record is all the more praiseworthy when it is understood that the team has been meeting strong rivals in the race for the pennant.

That this winning streak is not a fluke is evidenced by scores the laundrymen have made every set rolled so far this season exceeding 1,500 pins. The laundrymen have not yet met the Bureau, Waverley, Athletic Club or Charles Hotel teams, their closest contenders, and the contests with these clubs during the next two weeks undoubtedly will carry exciting and unshould prove very interesting.

Spectators will call forth some high-class bowling.

A strenuous match was staged Friday night, when the Waverleys and Charles Hotel team broke their tie for third place, the former team taking two games after dropping the first.

It was the spilling of the pennant did the stellar work for his team with games of 95, 124 and 110.

An interesting article on bowling has been written by W. V. Thompson, one of the best pin splitters in the country. On the 28th of the sport are well

position for the swing; (4) placing the ball; (5) the delivery.

"Ball and grip—Select a lightweight undersized ball, one twenty-five or twenty-six pounds in weight. It must be large and heavy enough for your first trial. See that the thumb and fingers are in the right size and be particular to see that the holes are at the proper distance apart. You cannot control the ball if the hand is cramped. Do not use a ball with sharp-edged holes.

"Position—Stand erect on the approach ten feet back of foot line. Place the pins in front of the ball rest on the left hand. Take a firm grip with the right hand. Swing the arm straight up and down over the ball. If your hand perspires, causing the ball to slip, use your handkerchief to dry the palm. Do not chalk or rosin.

"Delivery—Do not rush. Take four steps. Start with right foot and deliver the ball with left foot in front of the ball rest. Keep your arms back. Do not bend your arm or back. Keep your feet far apart, bend your knee and deliver the ball when right hand is directly above the ball rest. The ball should strike the side of the ball rest two feet in front of your left or from behind.

"Direction and speed—Form an imaginary line to the right side of head pin and bowl on that line. Go only enough speed to make a fair shot straight to the head pin. Pay no attention to score. Better leave all but the No. 10 ball in the alley until you have mastered your own delivery.

work careful study. Here is what he says:

"I would suggest that you practice the five correct positions for delivery by using as little exercise as possible, and at the same time, to get your strength you have; speed is unnecessary."

Bowling, like all physical exercises, will cause the muscles to be a trifle sore, especially so when a person is not accustomed to engage in it. The muscles need time to regenerate, not rolling over two or four games each day for the first ten days. After that they are used to the work, and will be conditioned and you will be able to bowl as many games as you want.

"There is no fatigue in bowling, much except from the bowler's arm. The finger and thumb used in gripping the ball will show fatigue before the body is."

"Bowling is beyond question the greatest of all indoor sports, and at the same time one of the best means for more benefits from this healthful exercise than from any other game that can be played, regardless of the weather."

"Bowling now is considered the most fascinating sport in the world today for a man to take his wife, mother, sister or best girl for an evening's entertainment and bowling all night the same as they had in former years by having theater parties."

"The popularity of bowling is letting up a little on the awful pace which has prevailed in the business world. They are taking time out of their week for a day's program enough of recreation to make the day enjoyable. They are patronizing the stores and restaurants, and are becoming never before, and all this is producing a better working force for the employer, and making him more satisfied in his job. In fact, in many cases the employer or his superintendent or manager is leading in the enthusiasm for the play."

"It is a wholesome change in any way that you look at it, and, with encouragement and praise to those who are being affected (and from those also, who should get into the program), there is nothing in making life so purely people far happier than before. Surely anything that does this is worth the attention of the public."

"The health of the men and the women that man the great industrial and financial machines that turn out the goods of the world, and to use of furnish the means of exchange or provide the equipment for travel and pleasure, is of the highest importance. Such a change now is taking place."

"It is the demand for play born in us, urged on by our parents and encouraged by them and the state, that cries out for expression in the midst of the modern age of the machine, or more at evening after toil, the fellowship or others bent upon the same pursuit, and the desire to choose and accept responsibility to use properly make the whole program one of delight and pride and interest or affection."

"We also should remember that in our large cities it is not possible for all of the people to have a golf course, and yet every program. For this reason alone there always will be a demand for such centers as we now have, where the masses of the second class of folks who are helping to make the city play program a success in commercialized recreation, once they get a little of the fun, become enthusiastic. The starchy old-fashioned factors or store owners of nature's way of keeping in shape; the circulation improves with exercise, better appetites, and the mind becomes better suited to the home and the work of the day and the pleasure itself all are better and the employer of labor should encourage his employees to participate in some game after the way." If he helps a large employer of labor it may be best to provide something close to the actual factor or store owner, or, as some already have done, put in an equipment in the store."

"If you are in the co-operation, if you are in the play; it stands between you and trouble, chase the doctor, and the doctor will tell you that country a better type of human beings. Surely this is worth while."

### The Southwestern Duckpin League

now is in full swing for its 1918-19 season. The teams are evenly matched and a good season is prophesied. The American Federation of Labor is the only team that is new in the league and is composed of the office staff of Secretary Frank Morrison.

The officers of the league are: President—A. Starnes; secretary-treasurer—J. M. Murphy; official scorer, J. Fowler.

cantillon made this possible. It was necessary to build bridges and make clearings, and Ruble led the pace in this respect. Kieper, an excellent catcher, also spent his last days here.

Cantillon has ever been the friend of those players who have delivered for the game and have been unfortunate. Many of them have stayed here for months after their days of usefulness had passed. Cantillon's philanthropy has never been advertised.
